Subject: Application for NYSC Software Engineer (PPA Opportunity)

Dear Hiring Team,

I am writing to apply for the NYSC Software Engineer (PPA Opportunity) position in Sabon Lugbe, Abuja.

I am currently an NYSC Corps Member seeking a Place of Primary Assignment.

I have a foundational understanding of software development, with exposure to Python (Django) and JavaScript, as well as basic experience working with frontend tools such as React and Tailwind CSS. Through personal projects and learning-based development, I have gained practical insight into how web applications are built and maintained.

Some of the learning projects I have worked on include:

- A **school fee payment system**, where I practiced building basic backend APIs and simple user interfaces.
- A **virtual top-up platform**, which helped me understand authentication, transactions, and application flow.
- An **exam timetable scheduling system**, developed as a learning project to explore API integration and problem-solving.

I am eager to learn, open to feedback, and committed to growing through hands-on experience and mentorship. I work well in a team, follow instructions diligently, and put in the effort required to learn new tools and technologies. With proper guidance, I am confident I can contribute meaningfully while continuing to grow as a developer.

Thank you for considering my application.

Sincerely,

Praise Godwin
